

## ( TECHNICAL BULLETIN )

FLEXIBLE HARD WEARING NON-SKID TOP-COAT

ASTEC IS COMMITTED TO ONGOING RESEARCH AND DEVELOPMENT

**Sports coat is a moderately flexible** yet hard wearing non-skid top-coat. The product is 100% acrylic coating and has proven to provide excellent exterior weathering. Although the finish looks like a low sheen finish because of the non-skid aggregate it is actually a full gloss product that is modified to provide good dirt pick-up resistance and washing properties on flooring applications.

Sports Coat is very quick drying and has good early water resistance. The product will resist wash off within one hour at 15 degrees and 50% relative humidity.

The product is supplied ready for use and should not be thinned. The product must be applied with a foam roller in the same manner that a roll on texture would be applied. For example; parallel strips, then cross hatched then tipped off in the same direction.

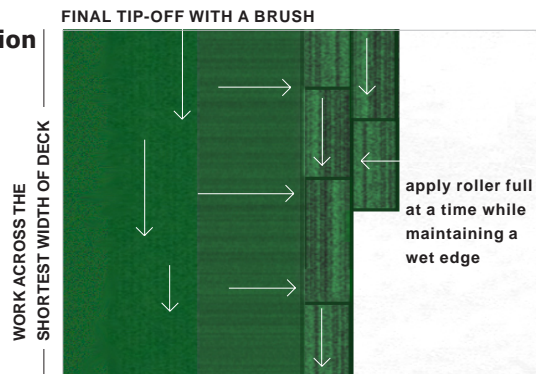

Sports coat is unlike conventional non-skid finishes that use silica sand as the non-skid component. The non-skid aggregate used is a synthetic particle that does not pack up like sand and allows the applicator to achieve a extremely uniform finish during application as well as many other **benefits including:**

- Does not absorb water and air born dirt.
- Does not leave white scuff marks from foot traffic like silica does
- Particle shape allows very uniform application and simplicity for the applicator.
- High solids formula allowing single coat application.
- Excellent tint acceptance.
- Extremely abrasion resistant, more than silica.

The product can be used on most construction surfaces and some of the principal areas are listed below:

- Over the top of elastic membrane systems were an attractive non-skid finish is required. For example roof and balcony decks that have table and chairs on them and are used for entertaining.
- Hotel walk ways and stairs that are exposed to water requiring non skid surface for safety.
- Concrete tennis courts.

### Application

*Astec Paints are a 100% Australian owned company committed to the research and development of technologically advanced coatings that provide premium durability against our harsh Australian conditions. Our coatings are manufactured with high regard for worker safety and environmental care and will provide you with absolute confidence in long term performance.*
